Creating the Premier Americas Gold Producer

AGM & CORPORATE UPDATE
May 3, 2023

Cautionary Notes

Forward-looking Statements. This presentation contains certain forward-looking information and forward-looking statements within the meaning of applicable securities legislation and may include future-oriented financial information. Forward-looking statements and forward-looking information in this presentation relate to, among other things: the strategic vision for the Company and expectations regarding exploration potential, production capabilities and future financial or operating performance, including investment returns; the Company's production and cost guidance; the timing for and the Company's ability to successfully advance its growth and development projects, including the construction of Greenstone and the expansions at Aurizona, Castle Mountain and Los Filos; the strength of the Company's balance sheet, and the Company's liquidity and future cash requirements; the aggregate value of common shares that may be issued pursuant to the at-the-market equity offering program; the potential future offerings of securities under the Base Shelf Prospectus or corresponding Registration Statement and any Prospectus Supplement; and the expectations for the Company's investments including in Sandbox, i-80 Gold, Bear Creek, Inca One and Pilar Gold. Forward-looking statements or information generally identified by the use of the words "will", "objective", "achieve", "intends", "envision", "potential", "on schedule", "on budget", "improve" and similar expressions and phrases or statements that certain actions, events or results "could", "would" or "should", or the negative connotation of such terms, are intended to identify forward-looking statements and information. Although the Company believes that the expectations reflected in such forward-looking statements and information are reasonable, undue reliance should not be placed on forward-looking statements since the Company can give no assurance that such expectations will prove to be correct. The Company has based these forward-looking statements and information on the Company's current expectations and projections about future events and these assumptions include: Equinox Gold's ability to achieve the production, cost and development expectations for its respective operations and projects; existing assets are retained and continue to produce at current rates; expectations regarding the impact of macroeconomic factors on the Company's operations, share price performance and gold price; prices for gold remaining as estimated; currency exchange rates remaining as estimated; availability of funds for the Company's projects and future cash requirements; prices for energy inputs, labour, materials, supplies and services remaining as estimated; construction at Greenstone being completed and performed in accordance with current expectations; the expansion projects at Aurizona, Castle Mountain and Los Filos being completed and performed in accordance with current expectations; the mine plans outlined in the technical reports for each project, including estimated development schedules, are unchanged; tonnage of ore to be mined and processed; ore grades and recoveries remaining consistent with mine plans; capital, decommissioning and reclamation estimates; Mineral Reserve and Mineral Resource estimates and the assumptions on which they are based; no labour-related disruptions and no unplanned delays or interruptions in scheduled construction, development and production, including by blockade; the Company's working history with the workers, unions and communities at Los Filos; all necessary permits, licenses and regulatory approvals are received in a timely manner; the Company's ability to comply with environmental, health and safety laws; the strategic visions for Sandbox, i-80 Gold, Bear Creek, Inca One and Pilar Gold and their respective abilities to successfully advance their businesses; and the ability of Bear Creek, Inca One and Pilar Gold to meet their payment commitments to the Company. While the Company considers these assumptions to be reasonable based on information currently available, they may prove to be incorrect. Accordingly, readers are cautioned not to put undue reliance on the forward-looking statements or information contained in this presentation. The Company cautions that forward-looking statements and information involve known and unknown risks, uncertainties and other factors that may cause actual results and developments to differ materially from those expressed or implied by such forward-looking statements and information contained in this presentation and the Company has made assumptions and estimates based on or related to many of these factors. Such factors include, without limitation: fluctuations in gold prices; fluctuations in

prices for energy inputs, labour, materials, supplies and services; fluctuations in currency markets; operational risks and hazards inherent with the business of mining (including environmental accidents and hazards, industrial accidents, equipment breakdown, unusual or unexpected geological or structural formations, cave-ins, flooding and severe weather); inadequate insurance, or inability to obtain insurance to cover these risks and hazards; employee relations; relationships with, and claims by, local communities and Indigenous populations; the effect of blockades and community issues on the Company's production and cost estimates; the Company's ability to obtain all necessary permits, licenses and regulatory approvals in a timely manner or at all; changes in laws, regulations and government practices, including environmental, export and import laws and regulations; legal restrictions relating to mining; risks relating to expropriation; increased competition in the mining industry; a successful relationship between the Company and its joint venture partner; the failure by Bear Creek, Inca One or Pilar Gold to meet one or more of their respective payment commitments to the Company; and those factors identified in the Company's MD&A for the year ended December 31, 2022 and its most recently filed Annual Information Form, copies of which are available on SEDAR at www.sedar.com and on EDGAR at www.sec.gov/edgar. Forward-looking statements and information are designed to help readers understand management's views as of that time with respect to future events and speak only as of the date they are made. Except as required by applicable law, the Company assumes no obligation to publicly announce the results of any change to any forward-looking statement or information contained or incorporated by reference to reflect actual results, future events or developments, changes in assumptions or changes in other factors affecting the forward-looking statements and information. If the Company updates any one or more forward-looking statements, no inference should be drawn that the Company will make additional updates with respect to those or other forward-looking statements. All forward-looking statements and information contained in this presentation are expressly qualified in their entirety by this cautionary statement.

Non-IFRS Measures. This presentation refers to all-in sustaining costs ("AISC") per ounce sold and sustaining capital which are measures with no standardized meaning under International Financial Reporting Standards ("IFRS") and may not be comparable to similar measures presented by other companies. Their measurement and presentation are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. Non-IFRS measures are widely used in the mining industry as measurements of performance and the Company believes that they provide further transparency into costs associated with producing gold and will assist analysts, investors and other stakeholders of the Company in assessing its operating performance, its ability to generate free cash flow from current operations and its overall value. Refer to the "Non-IFRS measures" section of the Company's MD&A for the year ended December 31, 2022, for a more detailed discussion of these non-IFRS measures and their calculation.

Cautionary Note to U.S. Investors Concerning Estimates of Reserves and Resources. Disclosure regarding the Company's mineral properties, including with respect to Mineral Reserve and Mineral Resource estimates included in this presentation, was prepared in accordance with National Instrument 43-101. NI 43-101 is a rule developed by the Canadian Securities Administrators that establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. NI 43-101 differs significantly from the disclosure requirements of the Securities and Exchange Commission (the "SEC") generally applicable to U.S. companies. Accordingly, information contained in this presentation is not comparable to similar information made public by U.S. companies reporting pursuant to SEC disclosure requirements.

Numbers may not sum due to rounding. **All dollar amounts in USD unless otherwise noted.**

Equinox Gold: Creating the Premier Americas Gold Producer

In its first five years Equinox Gold has grown from a single-asset developer to a diversified gold producer with the assets in place to produce more than 1 Moz of gold annually¹

1. Equinox Gold was created with the strategic vision of building an Americas-focused gold company that will responsibly and safely produce more than one million ounces of gold annually. To achieve its growth objectives, Equinox Gold intends to expand production from its current asset base through exploration and development and will also consider opportunities to acquire other companies, producing mines and development projects that fit the Company's portfolio and strategy. 2. Mid-point of Equinox Gold's 2023 production guidance.

Diversified Gold Producer: 7 Mines, 4 Countries, 1 New Mine in 2024

USA

4.6 Moz Reserves
~120 Koz annual production
~300 Koz with expansion¹

Canada

3.3 Moz Reserves²
~240 Koz annual production²
First production in H1 2024¹

Mexico

5.4 Moz Reserves
~170 Koz annual production
~300 Koz with expansion¹

Brazil

3.6 Moz Reserves
~325 Koz annual production
~375 Koz with expansion¹

1. Assuming existing assets are retained and continue to produce at current rates and that development and expansion projects achieve production at the production rates and timelines envisioned at the date of this presentation. 2. EQX's 60% share of Greenstone Reserves and annual production.

2022 Performance: Perception vs Reality

Market Concern	Equinox Gold Plan
Greenstone over budget	Greenstone is on track and on budget: At March 31, 2023, Greenstone was 73% complete overall, on budget and on track for first gold in H1 2024
Funding shortfall	Well funded for Greenstone construction: \$260 M remaining spend (EQX share) funded from \$285 M cash, \$127 M available credit with \$100 M expansion capacity, \$165 M in marketable securities, \$75 M available ATM facility, operating cash flow, other levers ¹
High-cost producer	Optimize production, cost controls: Operating plans should improve performance and reduce costs in 2023; Greenstone production will further lower costs in 2024
Operational challenges at Aurizona and Los Filos	Improved mining performance: Expanded Aurizona fleet to increase mining capacity, deferred Bermejil underground at Los Filos
Santa Luz ramp up, low recoveries	Improve mill feed and recoveries: Implementing process improvements to optimize recoveries and throughput

Peer-leading Growth Profile: Organic Growth from Existing Assets

1. Based on analyst consensus estimates and market data as at April 30, 2023. Source: Thomson One Analytics, FactSet, BMO, CIBC, RBC, Jefferies. 2. See *Equinox Gold Mineral Reserves and Cautionary Notes*. 3. B2Gold valuation and estimates do not include its potential acquisition of Sabina Gold & Silver.

Seven Operating Mines: 555,000 - 625,000 oz of Gold in 2023

Aurizona, Maranhão, Brazil

120,000 - 130,000 oz of gold

Mesquite, California, USA

80,000 - 90,000 oz of gold

Fazenda, Bahia, Brazil

60,000 - 65,000 oz of gold

Castle Mountain, California, USA

25,000 - 30,000 oz of gold

Santa Luz, Bahia, Brazil

60,000 - 70,000 oz of gold

Los Filos, Guerrero, Mexico

160,000 - 180,000 oz of gold

RDM, Minas Gerais, Brazil

50,000 - 60,000 oz of gold

**2023
Guidance**

Production: 555,000 - 625,000 oz

Cash costs: \$1,355 - \$1,460/oz

AISC: \$1,575 - \$1,695/oz

Greenstone: On Budget and On Track for H1 2024 Production

**~400,000 oz gold
per year¹**

**\$260 M
remaining spend²**

**1.27 g/t gold
average grade**

**5.5 Moz
P&P Reserves**

**2.6 Moz
M&I Resources**

1. 100% basis, of which 60% is attributable to Equinox Gold.
2. Equinox Gold's 60% share.

Organic Growth: Expansion Projects

Castle Mountain Mine, California, USA

Increase mining to stack over 45,000 t/d on heap leach pads
~218,000 oz/year average annual production, 14-year mine life¹

Aurizona Mine, Maranhão, Brazil

Mining of new underground and additional open-pit deposits concurrently
~137,000 oz/year average annual production, 11-year mine life²

Los Filos Mine, Guerrero, Mexico

Construction of a 10,000 t/d CIL plant to complement heap leach facilities
~280,000 oz/year average annual production, peak 360,000 oz/year³

1. March 2021 feasibility study showed \$389 M initial capital costs. Permitting underway. 2. September 2021 pre-feasibility study showed \$154 M initial capital costs. Feasibility study underway. Permits received for three portal locations. 3. October 2022 feasibility study showed \$318 M initial capital costs for CIL plant. Timeline for construction not yet determined. See *Technical Disclosure*.

Investing in Growth: Assets in Place for 1+ Moz Annual Production

~575 Koz incremental growth from existing assets¹

- Enhanced scale and diversity with Greenstone
- Catalyst rich investment plans
- Year-on-year production growth to 1 Moz
- Diversification across four countries

Revaluation potential with growth²

- Increased production, higher cash flow, lower costs
- Enhanced diversification across four countries
- Reduced execution risk as projects advance
- More funds available for shareholder returns

Financial Strength: Funded to Deliver Growth

Cash ¹	Debt Available ²	Investments ⁴	Resilience
<p>Unrestricted cash ~\$285 M</p> <p>Ongoing cash flow from seven operating mines</p>	<p>Corporate revolver \$127 M</p> <p>Accordion \$100 M ³</p>	<p>Equity investments ~\$165 M</p>	<p>\$75 M available through ATM facility pursuant to \$500 M base shelf prospectus ⁵</p> <p>Gold collar contracts from \$1,911 - \$2,106/oz for ~25% of production through March 2024 ⁶</p>

~\$410 M
TOTAL LIQUIDITY

1. Cash on hand at March 31, 2023. 2. There is ~\$279 M of convertible notes outstanding. 3. The accordion feature is subject to lender approval prior to being available to draw. 4. Approximate market value at April 30, 2023 of the Company's investments in I-80 Gold, Bear Creek Mining, Inca One, Pilar Gold and Sandbox Royalties. See *Cautionary Notes*. 5. ATM = at-the-market equity facility. 6. Weighted average of remaining gold collar contracts. See Note 9(b)(i) in the Company's Q1 2023 financial statements.

Non-core Assets: Bringing Value to Equinox Gold

Divest: Mercedes & Pilar	Launch: Solaris	Create: i-80 Gold	Create: Sandbox Royalties
<p>Sold non-core assets</p> <p>~\$175 M (Total value)</p> <p>Value creation:</p> <ul style="list-style-type: none"> • \$140 M cash payments • 2% NSR on Mercedes • 24.7 M shares in Bear Creek • 1% NSR on Pilar • 11.6 M shares in Pilar Gold 	<p>Spin-out to shareholders</p> <p>\$640 M (Current market cap)</p> <p>Value creation:</p> <ul style="list-style-type: none"> • Retained 30% at spin-out • Invested \$15 M • \$212 M total proceeds to EQX from sale of shares 	<p>Spinco from Premier acquisition</p> <p>\$630 M (Current market cap)</p> <p>Value creation:</p> <ul style="list-style-type: none"> • Retained 30% at spin-out • Invested \$14 M • \$24 M proceeds to date from sale of shares • \$125 M current market value of EQX interest 	<p>Spin-out non-core royalties</p> <p>34% (EQX corporate holdings)</p> <p>Value creation:</p> <ul style="list-style-type: none"> • New diversified metals royalty company created with Sandstorm Gold • Contributed royalties that had negligible value within EQX • Proposed up to \$75 M gold prepay arrangement that reduces risk for EQX and increases cashflow and revenue for Sandbox → increases value of EQX interest

ESG: Committed to Responsible and Ethical Mining

Target to achieve 25% reduction in GHG emissions by 2030

ENVIRONMENT

- Beat 2022 environmental incident target by 61%
- Improved environmental performance 7% in 2022 compared to 2021
- New solar and wind power contracts in Brazil will reduce GHG emissions by 4% and result in ~\$70M savings over the 10-year contract terms
- 2022 Climate Action Report
- 2022 ESG Report

SOCIAL

- Beat 2022 health and safety target by 36%
- Improved health and safety performance 30% in 2022 compared to 2021
- Supported community health, education, cultural and sports programs
- Funded skills training and infrastructure improvement
- Diversity and inclusion training at mine sites

GOVERNANCE

- Expanded ESG disclosure and performance metrics
- Updated and expanded governance policies with workforce-wide training
- Continued implementing leading industry standards including UN Global Compact, Towards Sustainable Mining and Responsible Gold Mining Principles

Highly Leveraged to Gold: EQX Outperforms With Rising Gold Prices

Highest leverage to gold

Equinox Gold's operating margins increase ~33% with a 5% increase in gold price ¹

Gold equities undervalued

Gold equities remain highly undervalued compared to historical gold : equity ratios

Market Performance Jan-Apr 2023

Gold Equities Highly Undervalued

1. Using \$1,900/oz gold as the baseline and assuming Equinox Gold achieves the mid-point of its cost guidance with ~\$1,600/oz AISC.

Gold Demand: Growing Gold Supply: Constrained

Macroeconomics

- Inflation: Has likely peaked but costs will stay high in 2023; gold tends to outperform in a stagflation environment
- Global unrest: Recession concerns and Russian/Ukraine war make gold a valuable risk hedge
- Interest rates: Gold rising on speculation that central banks will begin to slow the pace of interest rate hikes
- US economy: US\$ should weaken as tightening eases

Bullish demand and supply fundamentals

- No major new discoveries
- Total gold supply flat since 2014
- Investors switching asset classes from traditional stocks and bonds to commodities, including gold
- Yield drop will encourage institutional interest in gold
- Gold trading volumes increasing
- Gold ETF inflows have turned positive in 2023
- Central Bank buying in 2022 was highest on record at 1,132 tonnes of gold

Equinox Gold: Creating the Premier Americas Gold Producer

1. M&I Resources are exclusive of Reserves. 2. Mid-point of Equinox Gold's 2023 guidance of 555,000-625,000 oz of gold. 3. Cash on hand at March 31, 2023 + \$127 M undrawn revolving credit facility at March 31, 2023. 4. Approximate market value at April 30, 2023 of the Company's investments in i-80 Gold, Bear Creek Mining, Inca One, Pilar Gold and Sandbox Royalties. See *Cautionary Notes*. 5. Equinox Gold was created with the strategic vision of building an Americas-focused gold company that will responsibly and safely produce more than one million ounces of gold annually. To achieve its growth objectives, Equinox Gold intends to expand production from its current asset base through exploration and development and will also consider opportunities to acquire other companies and projects that fit the Company's portfolio and strategy.

Appendix

Equinox Gold: Corporate Summary

Common Shares ¹	312.7 M	Avg. Daily Shares Traded ⁵	TSX: 1.5 M + NYSE-A: 2.3 M
Unlisted Warrants @ avg. C\$5.30 ^{1,2}	0.2 M	Cash ⁶	~ US\$285 M
Options @ avg. C\$5.61 ^{1,2}	1.2 M	Net Debt ⁷	~ US\$550 M
Restricted Share Units ³	7.1 M	Convertible Notes @ avg. US\$6.52 ⁸	US\$278.9 M
Fully Diluted Shares ⁴	365.7 M	Market Cap (basic) ⁹	~ C\$2.1 B / US\$1.6 B

ANALYST COVERAGE

Canaccord Genuity, CIBC World Markets, Cormark Securities, Desjardins Securities, Haywood Securities, National Bank Financial, Scotiabank, RBC Capital Markets, TD Securities

1. Basic basis at May 2, 2023, as announced in the Company's Q1 2023 MD&A.
2. Weighted average warrant and option exercise prices are shown at the price that would be paid to Equinox Gold to receive one full EQX share. Warrant and option numbers are shown as the number of common shares that would be issued upon exercise of the securities.
3. Restricted Share Units are shares committed to management and directors that are issued subject to time-based and performance-based vesting terms, as part of equity-based compensation.
4. Fully diluted shares outstanding includes the Mubadala, Verition and Pacific Road convertible notes. See footnote 8.
5. Average daily trading value since January 2022.
6. Cash on hand at March 31, 2023, as announced in the Company's Q1 2023 financials.
7. Net debt comprises amount drawn on the revolving credit facility net of transaction costs, plus equity settled notes, minus cash. See footnote 8.
8. Face value of the convertible notes held by Mubadala Investment Company, Verition Advisors (Canada) ULC and Pacific Road Resources Fund. Mubadala and Verition hold notes of \$130 M and \$9.7 M, respectively, convertible at a fixed US\$ price of \$5.25 per share at the holders' option. Mubadala and Pacific Road hold notes of \$130 M and \$9.3 M, respectively, convertible at a fixed US\$ price of \$7.80 per share at the holders' option. If all four notes were fully converted, the Company would issue 44.5 M shares.
9. Calculated using the May 1, 2023 share price for EQX.

Equinox Gold: Technical Disclosure

National Instrument 43-101

Scientific and technical information concerning the **Los Filos Mine Complex** is summarized, derived, or extracted from the “Updated Technical Report for the Los Filos Mine Complex, Mexico” dated June 30, 2022 with an effective date of October 19, 2022. The Los Filos technical report has been filed with Canadian securities regulatory authorities and is available for review on Equinox Gold’s website at www.equinoxgold.com, on Equinox Gold’s profile on SEDAR at www.sedar.com and on Equinox Gold’s profile on EDGAR at www.sec.gov/edgar. Scientific and technical information concerning the **Mesquite Mine** is summarized, derived, or extracted from the “Technical Report on the Mesquite Gold Mine, Imperial County, California, U.S.A.” prepared by AGP Mining Consultants Inc. dated April 27, 2020 with an effective date of December 31, 2019. The Mesquite technical report has been filed with Canadian securities regulatory authorities and is available for review on the Company’s website and on Equinox Gold’s profile on SEDAR. Mesquite Mineral Reserve and Mineral Resources were updated at June 30, 2020 with the results announced in a news release dated October 8, 2020 which is available on Equinox Gold’s website, on SEDAR at www.sedar.com and on EDGAR at www.sec.gov/edgar. Scientific and technical information concerning the **Aurizona Mine** is summarized, derived, or extracted from the “Technical Report on the Aurizona Gold Mine Expansion Pre-Feasibility Study” prepared by AGP Mining Consultants Inc. dated November 4, 2021 with an effective date of September 20, 2021. The Aurizona technical report has been filed with Canadian securities regulatory authorities and is available for review on Equinox Gold’s website, on SEDAR and on EDGAR. Scientific and technical information concerning the **Fazenda Mine** is summarized, derived, or extracted from the “NI 43-101 Technical Report on the Fazenda Brasileiro Mine, Bahia State, Brazil” prepared by Equinox Gold Corp. dated October 22, 2021 with an effective date of December 31, 2020. The Fazenda technical report has been filed with Canadian securities regulatory authorities and is available for review on Equinox Gold’s website, on SEDAR and on EDGAR. Scientific and technical information concerning the **RDM Mine** is summarized, derived, or extracted from the “NI 43-101 Technical Report on the Riacho dos Machados Gold Mine, Minas Gerais, Brazil” prepared by Equinox Gold Corp. dated October 22, 2021 with an effective date of December 31, 2020. The RDM technical report has been filed with Canadian securities regulatory authorities and is available for review on Equinox Gold’s website, on SEDAR and on EDGAR. Scientific and technical information concerning the **Castle Mountain Mine** is summarized, derived, or extracted from the “Technical Report on the Castle Mountain Project Feasibility Study” prepared by M3 Engineering & Technology Corp. dated March 17, 2021 with an effective date of February 26, 2021. The Castle Mountain technical report has been filed with Canadian securities regulatory authorities and is available for review on Equinox Gold’s website, on SEDAR and on EDGAR. Scientific and technical information concerning the **Santa Luz Project** is summarized, derived, or extracted from the “NI 43-101 Technical Report on the Santa Luz Project, Bahia State, Brazil” prepared by Equinox Gold Corp. dated November 30, 2020 with an effective date of June 30, 2020. The Santa Luz technical report has been filed with Canadian securities regulatory authorities and is available for review on Equinox Gold’s website, on SEDAR and on EDGAR. Scientific and technical information concerning the **Greenstone Project** is summarized, derived, or extracted from the “NI 43-101 Technical Report, Hardrock Project, Ontario, Canada” prepared by G. Mining Services Inc. for Premier Gold Mines Limited dated January 26, 2021 with an effective date of December 16, 2020. The Greenstone technical report is available on Equinox Gold’s website and on SEDAR under Premier Gold’s profile.

Scientific and technical information concerning the **Hasaga Property** is summarized, derived, or extracted from the “National Instrument 43-101 Technical Report: Hasaga Project Red Lake Mining District, Ontario, Canada NTS MAP Sheets 52K/13 AND 52N/04” prepared by MRB & Associates for Premier Gold with an effective date of December 30, 2016. The Hasaga technical report is available on SEDAR under Premier Gold’s profile.

Readers are reminded that results outlined in the technical reports for some of these projects are preliminary in nature and may include Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves.

There is no certainty that the mine plans and economic models contained in any of the reports will be realized. Readers are further cautioned that Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. Readers are also advised to refer to the latest annual information form and technical reports of the Companies as well as other continuous disclosure documents filed by the Companies, which are available on SEDAR, for detailed information (including qualifications, assumptions and notes set out accordingly) regarding the Mineral Reserve and Mineral Resource information contained in this document.

Qualified Persons

Doug Reddy, MSc, P.Geo., Equinox Gold’s COO, and Scott Heffernan, MSc, P.Geo, Equinox Gold’s EVP Exploration, are the Qualified Persons under NI 43-101 for Equinox Gold and have reviewed and approved the technical information in this presentation.

Doug Reddy and Scott Heffernan have reviewed the technical reports for the Greenstone and the Hasaga Property for Equinox Gold. To the best of Equinox Gold’s knowledge, information and belief, there is no new material scientific or technical information that would make the disclosure of the mineral resource and mineral reserves or other technical information for the Greenstone Project or the Hasaga Property inaccurate or misleading.
